## PERSONAL PROJECTS

### Events Book - Android Studio and Firebase (07/2021 - Present)

- Worked jointly with three peers to develop an application for the event promotion market.
- Designed and developed the front end of the application using Android Studio.
- Facilitated user and component testing to improve the functionalities of the application.

### Gamerz Market – HTML, JavaScript, Node.js, and My SQL (02/2021 - 03/2021)

- Developed a full-stack e-commerce application along with two other peers which allows the user to sell and buy video games.
- Designed, architected, and wrote the front-end of the application using HTML and JavaScript.
- Created the backend using NodeJS and MySQL for storing user and product information.

## CERTIFICATES
